## Michigan Lagging Behind for Knowledge-Based Economy

Posted: Feb 13, 2008 08:30 AM

A new study claims Michigan is lagging behind other states in transition to a knowledge based economy. The report by Michigan Future, a non-partisan research group, says the key to Michigan's economic growth is keeping and attracting more college graduates to our state. Right now, it says Detroit and Lansing are not measuring up to other Midwest cities.

Lou Glzaer, Michigan Future, Inc.: "You got to pay attention to creating places where talent, particularly mobile, young talent, wants to live, and then investing in those things."

It's not all bad news though, the study found Michigan gained almost 50,000 jobs in portions of the health care and education sector. Still, they say there's a lot more work to be done.
